DETAILED ACTION

1. Receipt is acknowledged of Applicant's amendments, both filed August 24, 2007.
2. Claims 1-42 have been canceled.
3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 43-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nambu et al(EP 1179627). Nambu discloses a material for purification of industrial wastewater comprising substantially all of the subject matter set forth in Applicant's claims above. Note the use of a metal chelate forming fibrous resin, which may be of natural fiber, such as cellulose, and can be in the form of a sheet, mat, or non-woven fabric. The use of such a fiber in removing metal ions from solution in a semiconductor polishing slurry would have been an obvious application, since used polishing slurry is an industrial wastewater, and is known to contain unwanted metal contaminants which require removal to prevent wafer contamination.
5. Applicant's arguments filed August 24, 2007 have been fully considered but they are not persuasive. Applicant has canceled all original claims, and rewritten them as new claims 43-59. The same subject matter appears to have been presented in the newly presented claims, and the obviousness rejection in view of Nambu et al is still deemed to be valid. Nambu discloses a material for purification of industrial wastewater which uses a metal chelate forming fibrous resin, which may be of natural fiber, such as

cellulose, and can be embodied as a sheet, mat, or non-woven fabric. The use of such a fiber in removing metal ions from solution in a semiconductor polishing slurry would have been an obvious application, since used polishing slurry is an industrial wastewater, and is known to contain unwanted metal contaminants which require removal to prevent wafer contamination.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (571) 272-4494. The examiner can normally be reached on Monday through Thursday, and on alternate Fridays, from 8:00 to 5:30.
